

"Welfare Regimes and the Development of Gender Attitudes in Post-Communist Europe."

My paper will analyze the differences in attitudes toward gender relations and family policy among the European countries. It will especially emphasize the interplay between welfare regimes and gender attitudes as well as the development and changes in attitudes over time. In addition, it will analyze the similarities and differences between West European and post-communist countries with special emphasis on how institutional differences might explain differences in attitudes.

Sincerely,

Steven Saxonberg (Department of European Studies and International Relations at the Comenius University in Bratislava and Department of Public Policy and Social Work at the Masaryk University in Brno).
